

A Financial Solution to Support Business Growth

Helping to bring Members business and growth vision to life

What is Business Case Investment

Accelerate offers the possibility of cash/commission advancement to support Members through acquisitions.

Why is it Important?

Growth. These acquisitions look like smaller Mg As, Mg Us, or program administrators that either compete with Members directly today, offer what you offer in a different geography, or offer tangential coverages.

We can also bring financing options through equity investments or in some situations, commission advancements.

How does it work?

Present a business case and Accelerate will create a financial solution to make it happen.

Hub-N-Spoke Model

The Member is the hub and other potential smaller additions / acquisitions are the spokes. We can help diligence, acquisitions, and finance core add-on acquisitions.
